

Accessible Collection

Accessible & Code Compliant Bathing Products

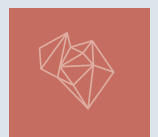

Florestone's offering of code compliant and accessible non-compliant products reflect our expertise and understanding of the intricacies of building for adaptability. Whether the project is renovation or new construction, residential or commercial, Florestone has products to ensure safety and peace of mind.

- **Code compliant showers and tub-showers** feature dimensions, threshold profiles and accessories that comply with ADA standards required for commercial applications across the country.
- **Non-code compliant accessible** models offer the same safety and usability features, with non-code sizing, low thresholds, and accessories.
- Both compliant and non-compliant models are offered in **one-piece** configurations best suited for new construction and **three-piece** remodel-friendly designs.

**Note: Models and accessories are compliant once installed per code requirements.*

ADA-compliant and accessible non-compliant shower bases for tile or other finish wall applications are available in both terrazzo and Saflor materials.

Accessible showers and shower bases feature roll-in, barrier free, and low-threshold profiles for easy access. Wall-to-wall trench design drains (select models) ensure water containment in low and no threshold showers, and outward facing return flanges on transfer showers ensure compliant clear floor space.

ADA Code Compliant

Product Features

ADA code compliant showers and tub-showers are equipped with code-specified accessories, including:

Stainless steel curtain rod

Pressure balance mixing valve with concealed check stops

Hand-held shower head with hose and stainless-steel slide bar/grab bar

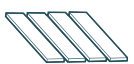

Stainless steel grab bar(s)

Stainless steel recessed soap dish
