

A Series: Accessible Collection

Accessible & Code Compliant Bathing Products

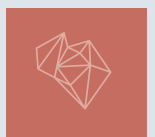

Florestone's offering of code compliant and accessible non-compliant products reflect our expertise and understanding of the intricacies of building for adaptability. Whether the project is renovation or new construction, residential or commercial, Florestone has products to ensure safety and peace of mind.

- **Code compliant showers and tub-showers** feature dimensions, threshold profiles and accessories that comply with ADA standards required for commercial applications across the country.
- **Non-code compliant accessible** models offer the same safety and usability features, with non-code sizing, low thresholds, and accessories.
- Both compliant and non-compliant models are offered in **one-piece** configurations best suited for new construction and **three-piece** remodel-friendly designs.

**Note: Models and accessories are compliant once installed per code requirements.*

A Series products are ideal for plumbing contractors and remodelers. All A Series products can be altered for your Aging-in-Place needs. Examples include grab bar placement, grab bar sizing, and seat location. Optional accessories include: curtain rod, shower curtain, 2" drain and collapsible Water Dam. The contractors choice for accessible shower products is the A Series from Florestone!

At Florestone, we take pride in providing safe independent bathing solutions for the senior adult population. Our accessible showers and tub showers, equipped with reinforced backing, grab bars, and more make adapting to change easy and comfortable for both the senior adult and caregiver. Staying connected to familiar surroundings and loved ones maintain dignity and autonomy, an important aspect for the aging in place community. Choose Florestone's A Series today for your accessible bathware needs.

Built for Accessibility, Engineered for Ease: The Shower Unit Plumbers Trust
