Saflor Shower Bases

Dependable. Durable. Proven.

Florestone has built its reputation on service and innovation rooted in market knowledge. The Saflor line of shower bases demonstrates these insights through a budget-conscious collection of products that addresses industry needs, simplifies the selection process and proactively eliminates installation headaches before they start.

Why Saflor?

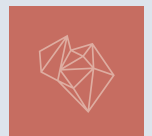

Constructed of durable composite material using a compression-molded process, Saflor shower bases are easy to install and light on the wallet, while being heavy on style and high on value.

- Consistency in finish and color
- Carefully curated size offering to meet standard market requirements
- A beautiful white finish makes it easy to complement an array of bathroom designs
- Designed elements that aid in installation and improve performance

THE EDGE

A Florestone Innovation

Featured on Florestone's RTM and Saflor shower bases, The Edge is a patented threshold design that addresses the critical issue of water containment by keeping water inside the shower. This minimally visible but effective barrier functions as a "fourth flange," directing water away from the shower exterior and towards the drain.

Saflor Shower Bases

Product Features

Integral Drain

One fewer connection point means less potential for leaks

Wedge Lock Seal

Creates a secure and worry-free drain installation

Ribbed for Level Installation

Set it and forget it—integral ribs means no mortar bed needed when installing on a level subfloor

Modern White Finish

Available in white only. Versatile and easy to pair with shower walls

High on Value

Prices and features that deliver on value

Coordinating Wall Solutions

Available in 60", 48" and 36" widths, Florestone 3-piece wall sets perfectly complement popular RTM and Saflor shower bases for a streamlined solution without the maintenance of tile and grout.
